

For the scenario below identify the entities, their attributes and appropriate keys

Finsbury Happy Zoo

Finsbury Happy Zoo's concept is to show animals together in their habitats. They have a number of enclosures of different habitat types (such as forest or tundra), different sizes (square metres), each having a main feature (such as a stream or a cave). Animals of different species share the same enclosure. Each enclosure has a unique number and there can be several enclosures with the same habitat but with a different main feature or of a different size. Each animal has a unique ID, and their name, date_of_birth, diet and description are stored. When an animal is put in an enclosure, the start date is recorded, and if they are transferred to another enclosure the end date is recorded. Zoo keepers may need to make a note about a particular animal, for example "not eating well today" and this is recorded along with the date. To make sure the animals don't eat each other a species compatibility table is maintained which has the following information; speciesA, speciesB, compatibility_rating (5 for happy neighbours to 1 for bitter enemies). Species are identified by their name, and a description of the species and their habitat type are recorded. Species are matched against enclosures by Zoo staff, and if suitable the maximum number of animals of a particular species for a particular enclosure is recorded to prevent overcrowding.

- 1) **Entity:** Enclosure
Attributes: Size, Main feature, and Type of Habitat
Primary Key: Enclosure ID
- 2) **Entity:** Animals
Attributes: Name of the Animal, Date of Birth of the Animal, Diet of the Animal, Description of the Animal, and Start/End date of the Animal
Primary Key: Animal ID
Foreign Key: Enclosure ID
- 3) **Entity:** Zookeeper Notes
Attributes: Note and Note date
Primary Key: Note ID
Foreign Key: Animal ID
- 4) **Entity:** Species
Attributes: Name of Species, Description of Species, and Habitat Type
Primary Key: Species ID
- 5) **Entity:** Species Compatibility
Attributes: Compatibility Ratings
Primary Key: Compatibility ID
Foreign Key: Species A and Species B
